

NF20Mesh - FTTN

# WiFi Router Setup Guide

# How to connect

## Setting up your new router

Skymesh routers arrive pre-configured. Simply plug in the supplied cables as per the diagram, switch on the new router and connect to it using the supplied WiFi password.

Note: This cabling setup is essential for an active connection. Please avoid changing the cabling setup below to prevent disconnection.

### Netcomm NF20Mesh

Please plug into  
the DSL port

## Warranty

Your new router comes with a 3-year advanced replacement warranty for full peace of mind. More information on our warranty can be found at [skymesh.net.au/warranty](https://skymesh.net.au/warranty)

# How to restart your internet connection

If you're offline, please follow the steps below as they may resolve any potential faults. If issues persist, please call us on **1300 759 637**.

- 1 First, turn off your wireless router.
- 2 Wait for about **10 minutes**.
- 3 Turn your wireless router back on.

Note: Please refer to the cabling setup provided on the 'How to Connect' page. This cabling setup is essential for an active connection.
